

Kinora Clinical Outcome Measures

Clinical AI Orientation (Part 21)

NDI, ODI, QuickDASH, LEFS, FAAM, KOOS/HOOS, Oxford, VAS/NPRS, PSFS, TUG, YBT
& More

Version 1.0 — Kinora Admin Conocimientos Upload

Disclaimer

Educational. MCID values are approximate and population-dependent — use current primary sources for research.

Table of Contents

- 1. Outcome Measure Records

1. Outcome Measure Records

RECORD: Neck Disability Index (NDI)

ID: OM-01

Measure: Neck Disability Index (NDI)

Region/Construct: Cervical

Purpose: Disability from neck pain

Scoring: 0–50 or %; higher = worse

MCID/Notes: ~5–10 points often cited (varies)

Psychometrics_Notes: Most common neck PROM

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Oswestry Disability Index (ODI)

ID: OM-02

Measure: Oswestry Disability Index (ODI)

Region/Construct: Lumbar

Purpose: Low back disability

Scoring: 0–100%; higher worse

MCID/Notes: ~10% points often discussed

Psychometrics_Notes: Gold-standard LBP disability

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: QuickDASH

ID: OM-03

Measure: QuickDASH

Region/Construct: Upper limb

Purpose: UE disability/symptoms

Scoring: 0–100; higher worse

MCID/Notes: ~8–16 points reported variously

Psychometrics_Notes: Faster than full DASH

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: LEFS

ID: OM-04

Measure: LEFS

Region/Construct: Lower extremity

Purpose: LE function

Scoring: 0–80; higher better

MCID/Notes: ~9 points commonly cited

Psychometrics_Notes: Broad LE conditions

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: FAAM

ID: OM-05

Measure: FAAM

Region/Construct: Foot/ankle

Purpose: ADL and Sports subscales

Scoring: % scale; higher better

MCID/Notes: MCID varies by subscale/population

Psychometrics_Notes: Ankle/foot specific

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: KOOS

ID: OM-06

Measure: KOOS

Region/Construct: Knee

Purpose: OA/injury knee domains

Scoring: 0–100 subscales; higher better

MCID/Notes: Domain-specific MCIDs

Psychometrics_Notes: Includes sport/QoL

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: HOOS

ID: OM-07

Measure: HOOS

Region/Construct: Hip

Purpose: Hip disability/OA

Scoring: 0–100; higher better

MCID/Notes: Domain-specific

Psychometrics_Notes: Analogous to KOOS

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Oxford Knee/Hip Scores

ID: OM-08

Measure: Oxford Knee/Hip Scores

Region/Construct: Knee/Hip arthroplasty focus

Purpose: Joint-specific PROMs

Scoring: 0–48 typically; higher better

MCID/Notes: MCID literature specific

Psychometrics_Notes: Common arthroplasty pathways

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: VAS Pain

ID: OM-09

Measure: VAS Pain

Region/Construct: Any

Purpose: Pain intensity

Scoring: 0–100 mm or 0–10

MCID/Notes: ~10–20 mm often discussed

Psychometrics_Notes: Simple; anchors matter

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: NPRS

ID: OM-10

Measure: NPRS

Region/Construct: Any

Purpose: Pain intensity

Scoring: 0–10

MCID/Notes: ~2 points commonly cited

Psychometrics_Notes: Routine clinical use

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Patient-Specific Functional Scale (PSFS)

ID: OM-11

Measure: Patient-Specific Functional Scale (PSFS)

Region/Construct: Any

Purpose: Patient-nominated activities

Scoring: 0–10 per activity; higher better

MCID/Notes: ~2 points often cited

Psychometrics_Notes: Highly individualized

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Timed Up and Go (TUG)

ID: OM-12

Measure: Timed Up and Go (TUG)

Region/Construct: Balance/mobility

Purpose: Functional mobility/fall risk screen

Scoring: Seconds; higher worse

MCID/Notes: Context cutoffs vary by population

Psychometrics_Notes: Standardized chair/walk protocol

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Y-Balance Test

ID: OM-13

Measure: Y-Balance Test

Region/Construct: LE motor control

Purpose: Dynamic balance asymmetry/reach

Scoring: Reach distance % leg length

MCID/Notes: Asymmetry thresholds researched (~4 cm anterior in some athletic studies)

Psychometrics_Notes: RTS screening component

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: VISA-A / VISA-P

ID: OM-14

Measure: VISA-A / VISA-P

Region/Construct: Achilles / patellar tendon

Purpose: Tendinopathy severity

Scoring: 0–100; higher better

MCID/Notes: Population-specific

Psychometrics_Notes: Tendon-specific PROMs

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: CAIT

ID: OM-15

Measure: CAIT

Region/Construct: Ankle instability

Purpose: Perceived ankle instability

Scoring: 0–30; ≤24 often CAI cutoff in research

MCID/Notes: Research selection tool

Psychometrics_Notes: International Ankle Consortium themes

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.
