

Kinora Exercise Library

Clinical AI Orientation (Part 20)

25 Flagship Exercises Across Regions with Progressions & Evidence Notes

Version 1.0 — Kinora Admin Conocimientos Upload

Disclaimer

Educational exercise orientation — individualize dosing; respect post-op protocols and red flags.

Table of Contents

- 1. Exercise Records

1. Exercise Records

RECORD: Cranio-Cervical Flexion (CCFT holds)

ID: EX-001

Name: Cranio-Cervical Flexion (CCFT holds)

Region: Cervical

Muscles Targeted: Longus colli/capitis

Difficulty: Beginner

Equipment: Optional pressure biofeedback

Progression: Increase hold time/pressure gently

Regression: Shorter holds

Contraindications: CAD red flags; acute fracture

Common Mistakes: Jaw clench, global SCM dominance

Evidence: Supported for neck pain motor control (Jull themes)

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Deep Neck Extensor Endurance

ID: EX-002

Name: Deep Neck Extensor Endurance

Region: Cervical

Muscles Targeted: Multifidus/semispinalis

Difficulty: Beginner–mod

Equipment: Mat

Progression: Lift/hold longer

Regression: Assisted

Contraindications: Fracture/instability

Common Mistakes: Shrugging with upper trap

Evidence: Endurance deficits common in neck pain

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Scapular Setting / Lower Trap

ID: EX-003

Name: Scapular Setting / Lower Trap

Region: Cervical-shoulder

Muscles Targeted: Lower/mid trapezius, serratus

Difficulty: Beginner

Equipment: None/band

Progression: Add arm elevation

Regression: Support arms

Contraindications: Acute unstable shoulder

Common Mistakes: Upper trap shrug substitute

Evidence: Axioscapular training aids neck/shoulder pain

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Side-Lying Thoracic Rotation (Open Book)

ID: EX-004

Name: Side-Lying Thoracic Rotation (Open Book)

Region: Thoracic

Muscles Targeted: Thoracic rotators, stretch anterior

Difficulty: Beginner

Equipment: Mat

Progression: Add hold/reach

Regression: Smaller ROM

Contraindications: Acute fracture

Common Mistakes: Lumbar substitution

Evidence: Common mobility drill — evidence as part of multimodal care

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Diaphragmatic Breathing

ID: EX-005

Name: Diaphragmatic Breathing

Region: Thorax/core

Muscles Targeted: Diaphragm

Difficulty: Beginner

Equipment: None

Progression: Add functional tasks

Regression: Hand cue only

Contraindications: Unstable medical resp status

Common Mistakes: Accessory neck breathing

Evidence: Breathing retraining adjunct

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Bird-Dog

ID: EX-006

Name: Bird-Dog

Region: Lumbar

Muscles Targeted: Multifidus, erector, glute, TA

Difficulty: Beginner–mod

Equipment: Mat

Progression: Opposite arm/leg holds

Regression: Single limb only

Contraindications: Acute unstable fracture

Common Mistakes: Lumbar extension sag

Evidence: McGill-inspired stability evidence themes

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Side Plank (regressed)

ID: EX-007

Name: Side Plank (regressed)

Region: Lumbar/core

Muscles Targeted: QL, obliques, glute med

Difficulty: Mod

Equipment: Mat

Progression: Full side plank

Regression: Knees bent

Contraindications: Shoulder injury limiting

Common Mistakes: Hips sag

Evidence: Endurance core

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Hip Thrust / Glute Bridge

ID: EX-008

Name: Hip Thrust / Glute Bridge

Region: Hip/pelvis

Muscles Targeted: Glute max

Difficulty: Beginner–adv

Equipment: Bodyweight/barbell

Progression: Single-leg, loaded

Regression: Isometric hold

Contraindications: Acute sacral fracture

Common Mistakes: Lumbar hyperextension

Evidence: Strong for glute strength

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Sidelying Hip Abduction

ID: EX-009

Name: Sidelying Hip Abduction

Region: Hip

Muscles Targeted: Glute med/min

Difficulty: Beginner

Equipment: Body/band

Progression: Standing/hitches

Regression: Isometric

Contraindications: Acute GTPS severe pain — modify

Common Mistakes: Hip hike/TFL dominant

Evidence: GTPS/PFP protocols

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Quad Set / TKE

ID: EX-010

Name: Quad Set / TKE

Region: Knee

Muscles Targeted: Quadriceps

Difficulty: Beginner

Equipment: Towel/band

Progression: Closed-chain squat

Regression: Assisted

Contraindications: Extensor mechanism rupture unprotected

Common Mistakes: Holding breath

Evidence: AMI after effusion/ACL

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Spanish Squat Isometric

ID: EX-011

Name: Spanish Squat Isometric

Region: Knee

Muscles Targeted: Quad / patellar tendon load

Difficulty: Mod

Equipment: Heavy band

Progression: HSR decline squat

Regression: Shallower angle

Contraindications: Acute rupture

Common Mistakes: Anterior knee shear if ungraded

Evidence: Patellar tendinopathy analgesia/loading

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Nordic Hamstring Curl

ID: EX-012

Name: Nordic Hamstring Curl

Region: Knee/hip

Muscles Targeted: Hamstrings

Difficulty: Adv

Equipment: Partner/device

Progression: Assisted Nordics

Regression: Eccentric slide outs

Contraindications: Acute hamstring tear early

Common Mistakes: Lumbar compensation

Evidence: Prevention evidence in football cohorts

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Heel Raises (Straight / Bent Knee)

ID: EX-013

Name: Heel Raises (Straight / Bent Knee)

Region: Ankle

Muscles Targeted: Gastroc / soleus

Difficulty: Beginner–adv

Equipment: Step/bodyweight

Progression: Single-leg loaded

Regression: Bilateral seated

Contraindications: Unprotected Achilles rupture acute

Common Mistakes: Bouncing ballistic early tendinopathy

Evidence: Achilles HSR protocols

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Banded Ankle Eversion

ID: EX-014

Name: Banded Ankle Eversion

Region: Ankle

Muscles Targeted: Fibularis longus/brevis

Difficulty: Beginner

Equipment: Band

Progression: Unstable surface

Regression: Isometric

Contraindications: Acute unstable fracture

Common Mistakes: Toe substitution

Evidence: CAI rehab staple

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports

Medicine.

RECORD: Short Foot / Foot Doming

ID: EX-015

Name: Short Foot / Foot Doming

Region: Foot

Muscles Targeted: Intrinsic / AH

Difficulty: Beginner

Equipment: None

Progression: Single-leg/dynamic

Regression: Seated

Contraindications: Acute Lisfranc unprotected

Common Mistakes: Toe clawing

Evidence: Arch control adjunct

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Single-Leg Stance Balance

ID: EX-016

Name: Single-Leg Stance Balance

Region: Ankle/knee/hip

Muscles Targeted: Global stabilizers

Difficulty: Beginner–mod

Equipment: None/foam

Progression: Eyes closed/perturbation

Regression: Bilateral

Contraindications: Unstable fracture NWB

Common Mistakes: Trendelenburg unchecked

Evidence: Sprain prevention/CAI

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Y-Balance / SEBT Reach Practice

ID: EX-017

Name: Y-Balance / SEBT Reach Practice

Region: LE kinetic chain

Muscles Targeted: Multiplanar control

Difficulty: Mod

Equipment: YBT kit/tape

Progression: Fatigue conditions

Regression: Shorter reaches

Contraindications: Acute injury irritable

Common Mistakes: Trunk lean cheat

Evidence: RTS batteries

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Farmer Carry / Suitcase Carry

ID: EX-018

Name: Farmer Carry / Suitcase Carry

Region: Trunk/LE

Muscles Targeted: Lateral core, grip, gait

Difficulty: Mod

Equipment: DB/KB

Progression: Heavier/longer

Regression: Lighter

Contraindications: Unstable hypertension uncontrolled medical

Common Mistakes: Hiking shoulder

Evidence: Functional loaded carry

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Deadlift Hip Hinge Pattern

ID: EX-019

Name: Deadlift Hip Hinge Pattern

Region: Lumbar/hip

Muscles Targeted: Glute, hamstring, erector isometric

Difficulty: Mod–adv

Equipment: Barbell/KB

Progression: Load increase

Regression: Dowel hinge

Contraindications: Acute disc with severe deficit — medical first

Common Mistakes: Lumbar flexion under load

Evidence: Task-specific strength

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Copenhagen Adduction

ID: EX-020

Name: Copenhagen Adduction

Region: Hip/groin

Muscles Targeted: Adductors

Difficulty: Mod–adv

Equipment: Bench/partner

Progression: Long lever

Regression: Short lever isometric

Contraindications: Acute adductor tear early

Common Mistakes: Pelvic drop

Evidence: Groin injury prevention evidence

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Sleeper Stretch (careful)

ID: EX-021

Name: Sleeper Stretch (careful)

Region: Shoulder

Muscles Targeted: Posterior capsule/IR

Difficulty: Beginner

Equipment: None

Progression: Cross-body alternatives often preferred

Regression: Gentle

Contraindications: Instability/hyper

Common Mistakes: Aggressive push into pain

Evidence: Evidence mixed — prefer symptom-free dosing

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Serratus Wall Slide / Punch

ID: EX-022

Name: Serratus Wall Slide / Punch

Region: Shoulder girdle

Muscles Targeted: Serratus anterior

Difficulty: Beginner–mod

Equipment: Wall/band

Progression: Plus push-up

Regression: Small range

Contraindications: Acute unstable scapula fracture

Common Mistakes: Upper trap dominance

Evidence: Scapular dyskinesis care

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Rotator Cuff Sidelying ER

ID: EX-023

Name: Rotator Cuff Sidelying ER

Region: Shoulder

Muscles Targeted: Infraspinatus/teres minor

Difficulty: Beginner

Equipment: DB

Progression: Standing band ER at 0/90

Regression: Towel under arm isometric

Contraindications: Acute repair protocol limits

Common Mistakes: Deltoid substitution

Evidence: High EMG classic cuff exercise

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Nerve Glider Median (gentle)

ID: EX-024

Name: Nerve Glider Median (gentle)

Region: PNS UE

Muscles Targeted: Median neurodynamics

Difficulty: Beginner

Equipment: None

Progression: Sliders→tensioners if indicated

Regression: Less excursion

Contraindications: Irritable radiculopathy/severe — dose carefully

Common Mistakes: Forcing symptoms lasting

Evidence: Neurodynamic treatment evidence adjunctive

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Pelvic Floor Coordinate Breath

ID: EX-025

Name: Pelvic Floor Coordinate Breath

Region: Pelvis

Muscles Targeted: Pelvic floor + diaphragm

Difficulty: Beginner

Equipment: None

Progression: Functional sit-to-stand

Regression: Education only

Contraindications: Red-flag cauda — refer not exercise

Common Mistakes: Valsalva bearing-down

Evidence: ICS-aligned PFMT principles when underactive

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.
