

Kinora Thoracic Spine Clinical Database

Clinical AI Orientation (Part 22)

Vertebrae, Rib Articulations, Breathing, Mobility (complements Part 3)

Version 1.0 — Kinora Admin Conocimientos Upload

Disclaimer

*Educational. Complements existing Part 3 thoracic orientation PDF. **Exclude cardiac/visceral red flags for thoracic pain.***

Table of Contents

- 1. Vertebrae
- 2. Ribs & Mobility
- 3. Pathologies

1. Vertebrae

RECORD: Thoracic Typical Pattern

ID: THOR-V-00

Notes: T1–T12 articulate with ribs; canal smaller than cervical; kyphosis normal

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: T1 Overview

ID: THOR-V-01

Vertebra: T1

Features: Costal facets on body; TP costal facet; SP longer/angled (mid-thoracic)

Motion: Limited by ribs; rotation relatively available mid-thoracic; extension limited

Clinical: Compression fracture risk osteoporosis mid-thoracic; referral visceral ddx

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: T4 Overview

ID: THOR-V-04

Vertebra: T4

Features: Costal facets on body; TP costal facet; SP longer/angled (mid-thoracic)

Motion: Limited by ribs; rotation relatively available mid-thoracic; extension limited

Clinical: Compression fracture risk osteoporosis mid-thoracic; referral visceral ddx

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: T6 Overview

ID: THOR-V-06

Vertebra: T6

Features: Costal facets on body; TP costal facet; SP longer/angled (mid-thoracic)

Motion: Limited by ribs; rotation relatively available mid-thoracic; extension limited

Clinical: Compression fracture risk osteoporosis mid-thoracic; referral visceral ddx

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: T12 Overview

ID: THOR-V-12

Vertebra: T12

Features: Costal facets on body; TP costal facet; SP longer/angled (mid-thoracic)

Motion: Limited by ribs; rotation relatively available mid-thoracic; extension limited

Clinical: Compression fracture risk osteoporosis mid-thoracic; referral visceral ddx

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

2. Ribs & Mobility

RECORD: Rib Articulations Summary

ID: THOR-RIB-01

Joints: Costovertebral + costotransverse + sternocostal

Breathing: Pump/bucket handle

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Thoracic Mobility Clinical

ID: THOR-MOB-01

Assessment: Rotation ROM, PAIVMs, rib spring, breathing symmetry

Rehab: Rotation mobility + extensor endurance + scapular

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

3. Pathologies

RECORD: Thoracic Compression Fracture

ID: THOR-PATH-01

Red_Flag: Osteoporosis, trauma, night pain — image

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.

RECORD: Thoracic Disc / Radicular Pain

ID: THOR-PATH-02

Note: Less common than lumbar; band-like pain; myelopathy possible

References: Standring S. Gray's Anatomy. Moore KL et al. Clinically Oriented Anatomy. Netter FH. Neumann DA. Kinesiology of the Musculoskeletal System. Magee DJ. Orthopedic Physical Assessment. Brukner & Khan Clinical Sports Medicine.
